ASSEMBLY AND TESTING

## VERSATILE, INNOVATIVE MANUFACTURING SOLUTIONS

Altek, Inc. is a premier global contract manufacturer specializing in the aerospace, defense, space, technology, and medical sectors. Our core competencies include injection molding, injection mold tooling and state-of-the-art machining.

Our 150,000 sf facility is located in Liberty Lake, WA, where we offer a complete service center with painting, printing, bonding, hardware installation, electro-mechanical assembly and final assembly, and testing. We are honored to have some of the best machinists in the industry running our complex machinery, ranging from standalone 3 axis vertical mills to 5 axis high speed horizontal mills with linear pallet shuttle systems, and 2 axis lathes to 9 axis mill/turns allowing us to accommodate a full range of our customers' needs. Our molding technology includes injection molding press sizes ranging from 40 ton to 1760 ton machines, most of which are outfitted with robotics and integrated conveyor systems.

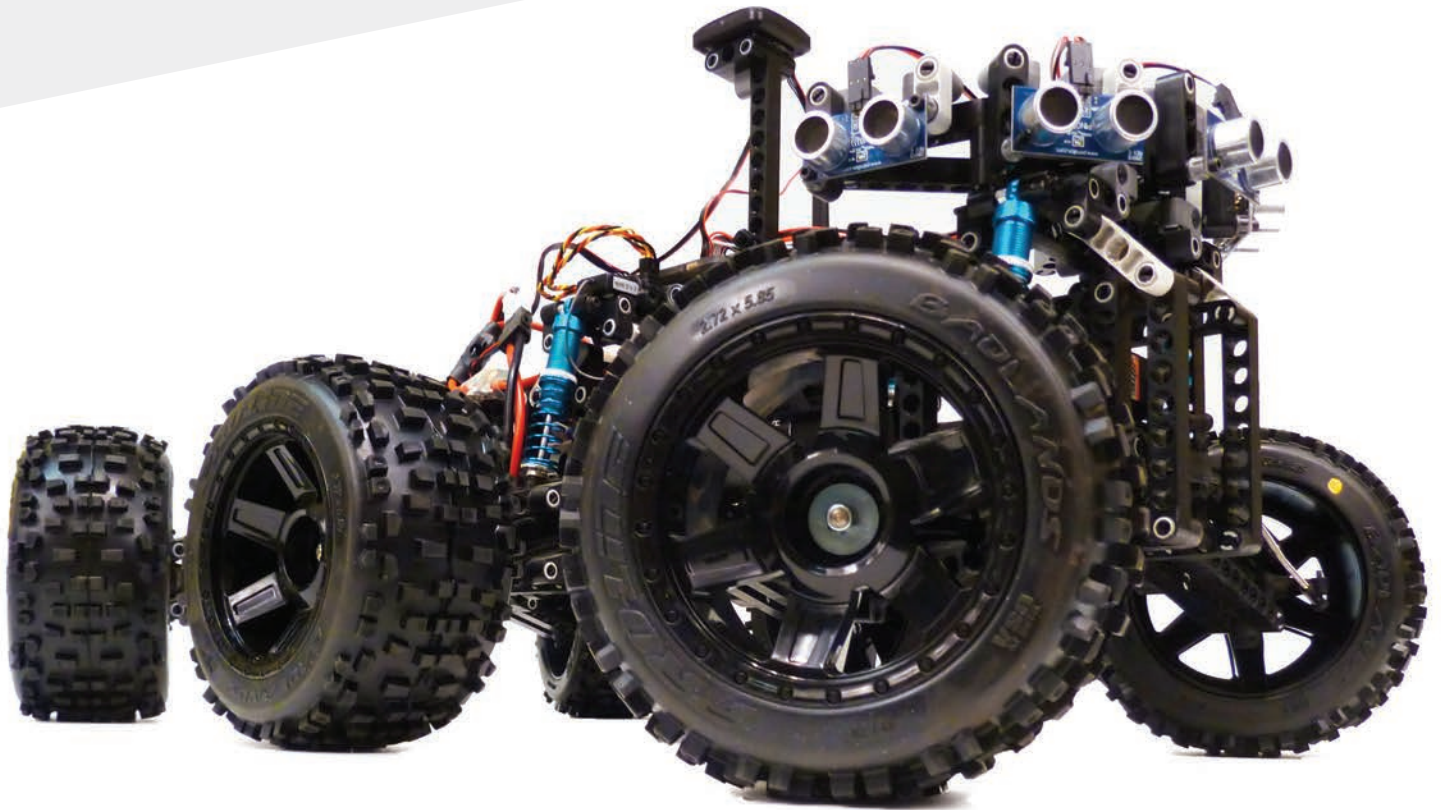

- » ISO 13485 Certified
- » REACH Compliant
- » ROHS Compliant
- » AS9100 Certified
- » ITAR Registered
- » Boeing Research & Technology  
BAC5321D Class 1 & 2 Qualified

## WHAT CAN WE DO FOR YOU?

Altek Technology applies a committed research and development mindset to all of our endeavors, ensuring innovative solutions to our customers' biggest challenges and audacious ideas. Whether working hand-in-hand with a customer on mechanical elements of a design, prototyping, determining optimal materials, or developing a whole new technological approach, we take on every opportunity with a vigorous pioneering perspective.

## OUR CAPABILITIES

- » Injection mold design and manufacturing
- » Versatile precision machine shop
- » Complete assembly and testing
- » Pad printing, laser printing and in-house paint facility
- » Excellent customer service and design-for-engineering

## OUR PROMISE

MANUFACTURING as dynamic as our customers –  
ACHIEVED with innovation and integrity
